QGLOBE – Soil conservation plans

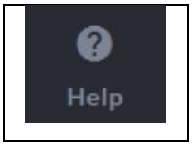

QUEENSLAND GLOBE HOME PAGE

 Access **Queensland Globe 2** via:- http://qldglobe.information.qld.gov.au/

1. Agree to TERMS & CONDITIONS and SPECIFIC DATA CONDITIONS to continue
2. Familiarise yourself with 'TAKE TOUR' or launch right in with "Get STARTED"
3. Or if a web address is not available, simply searching in a browser for "Queensland Globe"

QUEENSLAND GLOBE INFORMATION & HELP

- For online assistance to Get Started, access Queensland Globe **Information & Help**
  Queensland Globe - Help (information.qld.gov.au)

GET STARTED and LOGGING IN

- Select GET STARTED to open the Main Queensland Map
- Create a Login - connecting one of your existing [Twitter; Google; Facebook etc] which will be retained for the day;

Hint: by *Logging in* you will be able to save customised maps into the **Maps** area and share map links with other users across the network.

NAVIGATION AROUND THE GLOBE

Hint: Wait while data is being re/loaded a **Blue Line** will pass across the top of screen.

- Once you are logged in, your name will appear in the upper right corner of the window
- To Pan around the Globe, use the left mouse button, click and drag.
- To Zoom in or out, use the **+** or **−** buttons in the lower right of the window, or alternatively, if available, use the mouse wheel.
- To Zoom to a selected area, hold down the keyboard Shift key, left mouse button click and drag a window over the required area. Releasing the mouse button initiates the zoom to the window.
- To rotate the screen, right mouse button click and drag.
- To reset rotation to North click on the compass button

MAIN SCREEN VIEW

A Login or Sign up – email; facebook; twitter account

B Main Search Toolbar – Topics selection; Search by reference; Add Layers; Add Places & Map Layouts.

C Open this toolbar to select Identify button; Measure distances and draw or change colours.

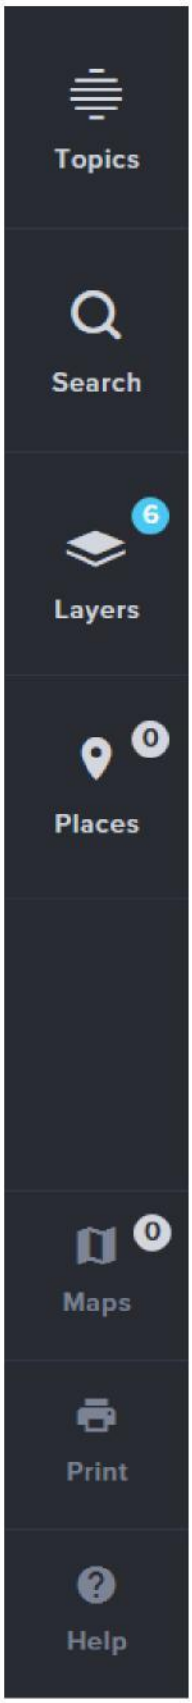

D Select side arrow to open Legend panel and view symbolised Layer features.

E Zoom In/Out; View older Imagery; Swipe to compare Layers.

MAIN SEARCH TOOLBAR

TOPICS

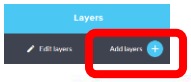

- Click on the Topics buttons to show a list of pre-arranged data layer Topics.
- Click on the Topic Title button to see additional information. Eg “Resources”
- Click on the button to return to the previous screen.
- Clicking in the launch check box to add a group to your current map

SEARCH

- To search for a particular location or feature, click on the **Search** button (upper left) then choose the appropriate option.
- Enter the search term (ie: 16-32 enterprise street) and select to execute the search.
- If you want to retain the searched location, click on the icon to save Into ‘Places’.

LAYERS

- The Queensland Globe contains many hundreds of layers of information which have been grouped under International Standards (ISO) themes, such as Boundaries, Economy, Farming, Location, Inland waters etc.
- To search for specific layers, click on the Layers tab, and then click on the:

  Add layers 

  button.

PLACES

- You can save your selection of ‘Places’ (placemarks lines or polygons)
- Search results can be added to Places by clicking on the icon.
- Graphics and text drawn when using the tools near the Identify tool are also created in Places.

- Objects in Places can be removed by clicking on the Places tab, then selecting 

  then clicking the red remove button 

  and then Done

MAPS

- Using **Maps** is a great way to save maps using the layers that you frequently use. This avoids having to relocate or reload these layers every time you open Queensland Globe.
- To use this feature, you will need to *create an account*. Saved Maps are not accessible across your platform accounts (ie. Facebook & Twitter)
- Assemble the Layers you require and zoom to the desired map extent.

- Select the Maps tab, enter a suitable map name and save the map containing your feature data layers for later recall or sharing via the internet.

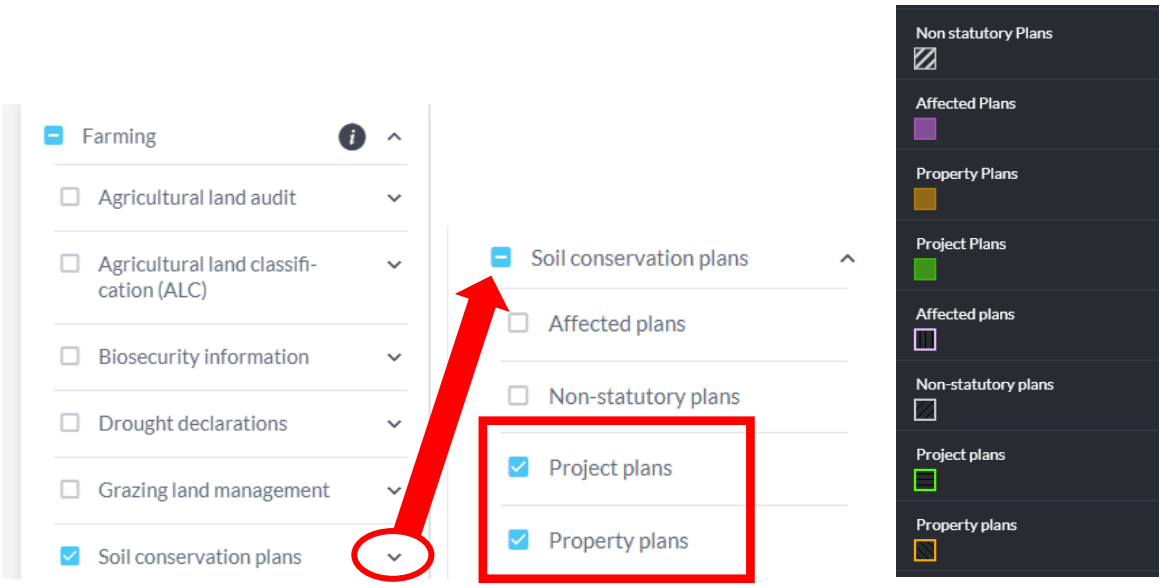

Soil Conservation Layers:

To find the Soil Conservation Plans layer in Globe you need to add relevant 'Layers' using the MAIN SERACH TOOLBAR.

Select the 'Layers' tab and 'Add layers + ' scroll down to the "Farming" data group.
Open the group using the down arrow and select 'Soil Conservation Plans' – this adds all four layers which will show Affected plans, Non-statutory plans, **Project plans and Property plans**. See the legend on the right-hand for how any plan will appear.

Tip: Use the 'Soil conservation plans' drop down arrow - to refine your search to Project & Property plans only) Note: Non-statutory plans are not 'approved' under the *Soil Conservation Act 1986* and are therefore not available for distribution.

The Queensland Soil Conservation mapped areas should now display as shown below:-

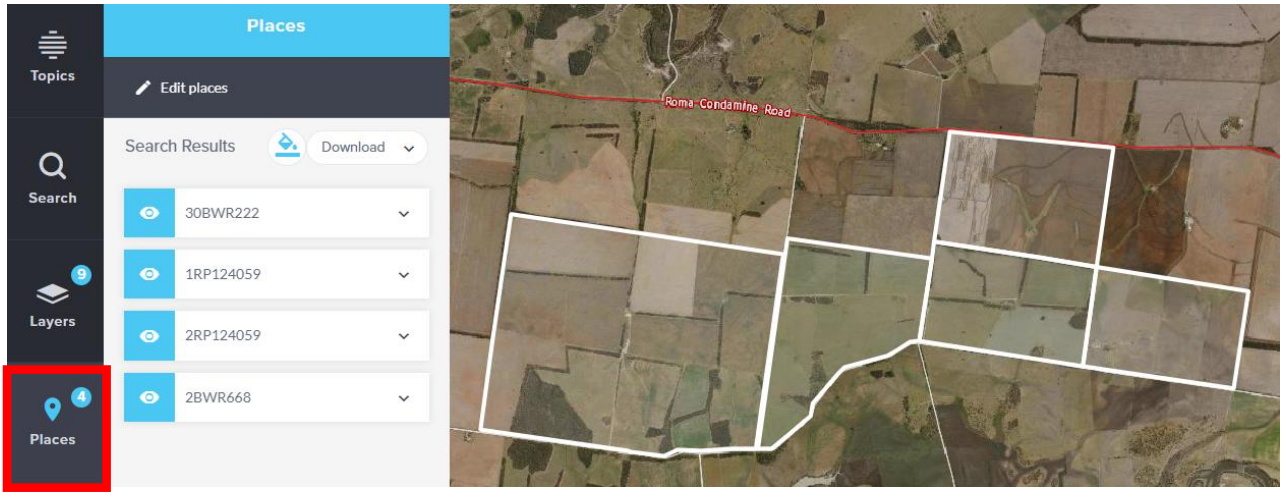

Search for the subject property description:

Enter Lot on plan or address in the ‘Search’ tab. Below is an example of no ‘approved’ plans over a property.

TIP: more than 1 Lot on Plan:- If you have more than 1 lot on plan, click the button, adding each lot/plan to ‘Places’. All lot on plans will be highlighted with a white border.

Review the complete list of properties entered - using the ‘Places’ tab.

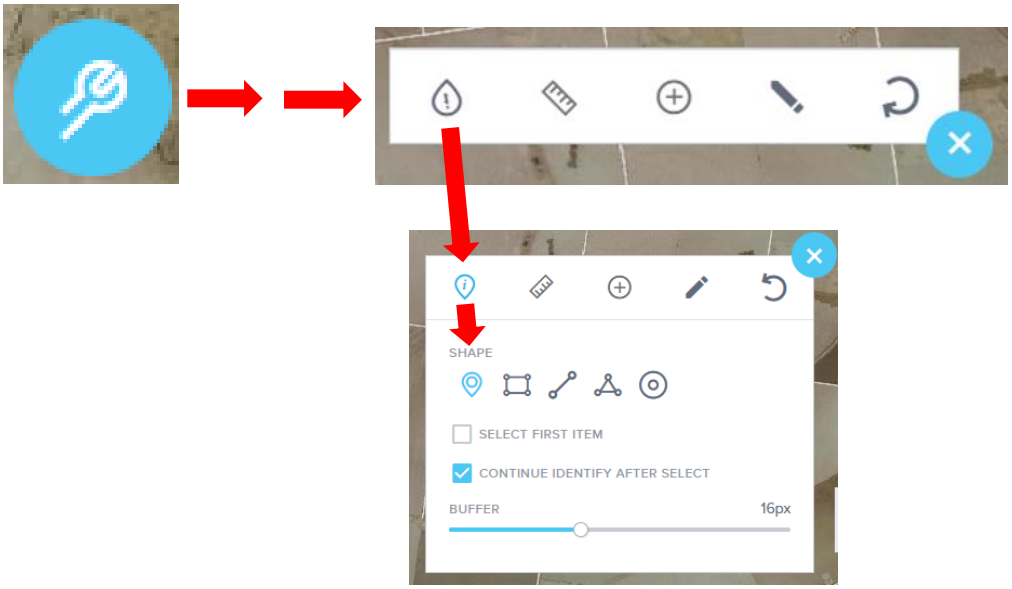

Identify available Soil Conservation plans

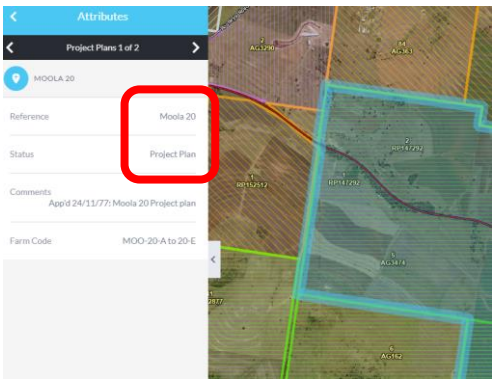

Any approved Property or Project Plans within the window extent are displayed on screen. Plan boundaries are identified as shown in the Legend and the Plan Reference will be described as a name or number

Select the toolbox icon ➡ ➡ select the identify and then ‘identify point’ shape icon

Use this ‘Identify’ tool within a boundary of a Plan area and view the attributes under the ‘Layers’ slide out listings.

Plan Reference: note the Project/Property plan reference(s) and at least one Lot/Plan;
Contact soil.enquiry@resources.qld.gov.au to request a copy of the plan.
